

Personal Expense Tracker

The Personal Expense Tracker is a user-friendly application designed to help individuals manage their financial activities efficiently. This project focuses on enabling users to track their income, expenses, and savings while providing insights into their spending habits. The application allows users to categorise transactions, set monthly budgets, and monitor their progress in achieving financial goals.

Features:

- HTML: To create the structure of the application, including forms for inputting expenses, tables for displaying data, buttons for navigation.
- CSS: To style the application, making it visually appealing and easy to use.
- Java: For handling user inputs, performing calculations, it is used for Backend.

This project demonstrates the importance of personal financial management and provides a practical tool to promote financial discipline. It combines concepts of software development, database management, and user experience design, making it an ideal project for real-world applications.
